The total costs will reduce the investment by:	CHF	1'052.64
--	------------	----------

Notification without signature

Information regarding statement of costs

If the actual costs are unknown, they are estimated on the basis of, among other factors, empirical values from concluded transactions. When estimating the sale costs in the event of a purchase transaction, it is assumed that a later sale via the same channel (online or by telephone) will be carried out at the same trading venue and at the same price. The greater the complexity of the transaction, the more the actually billed costs may deviate from the estimate provided.

If any changes are made to the order (e.g. change to limit or trading venue), a new statement of cost transparency will not be issued.

The costs and ancillary costs relating to investment services and ancillary investment services are as indicated in our price brochure. The fees listed under "Ongoing costs" are generally incurred independently of any transaction and will be debited from your account periodically. Fee levels are determined by the average value of the assets held in your portfolio. The amounts shown are based on a proportion of the transaction, calculated as an average value. This does not apply to cases in which no periodic fee has been agreed and the fees are charged with the transaction.

On request, we will provide you with a detailed summary of the expected costs. Your client advisor will be happy to answer any questions you may have.
