VP Bank e-banking

Installation guide for Windows

Note: For the installation of e-banking, you need administrator rights on your computer.

1. Open the www.vpbank.com/e-banking website. On the «Downloads & Tools» menu, click on «e-banking version for Windows».

2. A dialogue box appears. Save the file «e-banking version for Windows» on your computer.

3. When the download is completed, click on the button «Run» or double-click on the downloaded file «setup-en-win».

4. A system notification appears. Please confirm it. VP Bank e-banking is certificated, thus you can trust our program.

5. The installation assistant appears.

6. Follow the instructions provided by the installation assistant. Once the routine is successfully installed, you will receive a notification. Confirm it by clicking on «Finish».

7. Start VP Bank e-banking via the link on your Desktop.

8. You can now login to e-banking.
